Summary

Innovative and detail-oriented Web Developer with professional experience designing and implementing complex, large-scale web and mobile applications. Specializes in modern frontend ecosystems, specifically React, Next.js, Astro, and some React Native. Proven expertise in building custom UI components and high-performance, real-time SaaS systems. Passionate about clean architecture, state management, and delivering highly polished user experiences.

Education

Himalaya College of Engineering

Chyasal, Lalitpur

High School

Projects

Broxium UI Documentation Site

- Architected an interactive documentation platform for @broxium/ui using Astro 5, React 19, and Tailwind CSS v4.
- Implemented a full theme customization system (with various color schemes) and 3D WebGL effects from different available libraries.
- Built global fuzzy search, an animated terminal simulator, and client-side routing within an Astro static site, managed via Zustand.

Podium Dashboard (Cloud Infrastructure Control Plane)

- Built a full-featured dev-infrastructure management UI using React 19, Vite, and TanStack Table to manage 12+ entity types (Servers, Networks, APIs, Domains).
- Implemented a Server Onboarding wizard with real-time progress tracking, Monaco Editor for raw config editing, and JWT-authenticated login flows with auto-logout.
- Developed reusable utilities like a debounced search bar, persistent pagination, and an action lock utility to prevent duplicate-submissions.

AutoFlow (Unified Social Media Inbox)

- Led the UI architecture for a cross-platform social media management dashboard (Facebook, Instagram, WhatsApp, TikTok) using Astro 5 and React 19.
- Implemented a unified chat inbox with filtering/multi-select, cross-platform post creation with live previews, and threaded comment management.
- Built animated interactions using Framer Motion and a consistent design system utilizing company's custom @broxium/ui library.

iRestro (Restaurant Management SaaS Dashboard & Mobile App)

- Built a pure-SVG chart system for restaurant dashboard.
- Developed complex UI-heavy pages including a visual floor/table manager with drag-merge, real-time POS, and kitchen display system with live order workflows via Socket IO.

- Designed the complete UI for a cross-platform POS and kitchen management app, featuring gesture-driven page tabs.

Brodox Website (Marketing & E-commerce Platform)

- Developed UI for company's marketing site using Astro 5, React 19 islands, and Tailwind CSS 4.
- Brainstormed and created a complex interactive dashboard simulation visualizing real-time business operations using deterministic seeded random state and SVG animations.
- Built a multi-step signup wizard, tiered pricing page, and heavily utilized Framer Motion for scroll-triggered animations and staggered reveals.

Brodox Business (Multi-tenant E-commerce SaaS)

- Led frontend development for core platform modules using Next.js, React 19, TanStack Table, and SWR.
- Built a highly complex Products page featuring server-side pagination, bulk actions, variant generation via cartesian products.
- Built a MediaPicker modal with drag-and-drop uploads, folder tree structures, and bulk actions, integrated across product forms.
- Designed and developed SwiftPOS (Point-of-Sale) with multi-tab cart systems, delivery zone management, split payments, and variety of invoice templates.

Skills

Languages

Python, JavaScript

Frameworks

Django, Angular, React, Astro, NextJS, NestJS

Tools

Git, Docker, Figma, Postman, Bruno

Database

MySQL

Experience

Xprin Technology

Junior Frontend Developer
